“I LOVE YOUR GAMES! Thanks for your efforts in making a game out of TAKS. I’ve taught for 26 years and it’s a sad day when you can’t let kids really enjoy school and LEARN what they need to learn for adulthood.”

This game is great! The student’s always wanted to play it when their class work was completed. It has great jokes, the kids understood the jokes and thought that they were very funny. This is a great educational resource and fun for all students!

My 5thgrade daughter really struggled through her first two efforts at the TAKS Math test and became very discouraged... I am proud to say that she not only PASSED her test, she only missed seven questions in all! I will gladly recommend the game to parents of kids who are struggling through TAKS!

The TAKSKIDS Game helped students understand a lot of concepts in small groups and also provided the teachers yet another resource for small group instruction. I would recommend this game to parents also. Every home really needs one!
